**Subject:** RE: Haystack site near Brown Vandever home

Hi Freida,

I talked to Randy this afternoon and he provided the following information:

The Brown Vandever home is on the Section 23 mine site and was recently constructed on excavated cover material. Across the road is a fenced mine site area with a faded sign and high gamma readings. Randy conducted a removal action at the yard and warned the residents to stay away from the mine across the road. The residents are trying to sell the home.

Please let us know if you want more information about the site.

By the way, we are planning to bring Robin Richardson up to the Tronox Section 32 and 33 mines, at 9:15 or so before heading to Haystack. I'll send an updated itinerary on Thursday.

Linda

**Subject:** Haystack site near Brown Vandever home

Hi Freida,

I'm writing in response to your request for information about the Brown Vandever home site you visited in Haystack. The home was on reservation, and across the road from a highly contaminated site with a faded warning sign and fence although there was evidence of access to the site.

The Removal Site Evaluation scans will be conducted at Haystack No. 1, Section 24 (Nan-A-Bah Vandever) and Bibo Trespass. See attached map of the area and Weston site screens for Haystack and Section 24. Both mines have faded signs warning of radiation contamination, which is similar to the location you described; however, there are no homes within a quarter mile of Haystack No. and the 3 homes and church near Section 24 are less than 2 times background.

I'm copying Randy to see what he knows. Also, I'll ask Clancy what he remembers when I see him at 10. Will someone from your staff be able to show Randy this area next week?

Linda
